YH14 KYMRON Mini Track Excavator. This excavator has a 14 HP Briggs and Stratton gas engine. The YH14 is a step up and comes in different color options. This model has an upgraded hydraulic pump unlike the competition and can be replaced with a Parker. The KYMRON YH14 has upgrades like solid steel hydraulic lines on the boom along with a modern molded control console with digital gauges and upgraded spool valves for super smooth operation for doing precise work. This machine weighs 2,200Lbs and can lift upward of 1,500LBS which is quite impressive! The YH14 has an ergonomic control console placement so you can sit up straight in the operator station and operate comfortably. Give us a call for up-to-date inventory.

Modern control console / digital gauges
True rollover protection system.

A foot pedal is added for operating the hydraulic thumb.
Rigid steel hard plumbed lines down the boom
upgraded spool valve system for buttery smooth control.

The advantage of KYMRON machines is our exclusive design which is set up to allow name brand Hydraulic Pumps, Drives and Motors from Parker USA and Eaton USA to be installed as direct replacements on our machinery.

The KYMRON YH14 has an upgraded directional spool valve block that is manufactured to the tightest of tolerances to make a smooth comfortable operation.

This version includes the factory installed (side Swing Feature) which allows you to swing the boom approximately 45 degrees to the left or right to get into tight spaces and position the boom to dig parallel to walls and fences.

This version of the YH14 also includes the factory installed retractable/extendable tracks which can be retracted in to make the overall width of the machine 35" narrow to fit through tight spaces or extended them out to make the overall width 47" wide.
